

AGRO FOOD» »PARK®

English below

Godmorgen!

Vi er klar med endnu flere drop-in møder, nye som gamle. Derudover vil vi gerne minde alle om hvordan vores el-ladestationer skal bruges.

Ha' en skøn uge!

De bedste hilsner
Agro Food Park

Glem ikke vores Drop-in møde om Plantebranchen, Naturli Foods og Do Not! call me M_lk

Plantebranchen er Danmarks talerør for virksomheder der importerer, fremstiller og/eller markedsfører plantebaserede fødevarer. Foreningen er uafhængig i forhold til alle andre interesser, og fremstår med den helt klare profil eksklusivt at varetage erhvervsinteresserne for de grønne fødevarerproducenter.

Kom og hør **CEO Henrik Lund fra Naturli' Foods A/S** fortælle om både Plantebranchen og udviklingen i Naturli' Foods A/S, herunder den sidste nye drik "Do Not! call me M_lk". Der vil være smagsprøver.

Drop-in mødet er den 6. april fra kl. 15.00-16.00 og foregår i kantineområdet, Agro Food Park 15. Det er gratis at deltage og mødet foregår på engelsk.

Klik her for at tilføje mødet til din Outlook kalender og send gerne en mail til srma@agrofoodpark.dk, hvis du ønsker at deltage.

Drop-in møde om plantebaserede erstatningsprodukter - elsket af mange - også af mange uønskede mikroorganismer

Kom og hør ISI Food Protection fortælle om fødevareregodkendte mikroorganismer specielt tilpasset plantebaserede erstatningsprodukter.

Drop-in-mødet finder sted den 20. april kl. 15.00-16.00 i Agro Food Park 15 (mødelokale 7+9). Deltagelse er gratis, men send gerne en mail til srma@agrofoodpark.dk, hvis du har lyst til at deltage.

Obs. mødet foregår på engelsk og du kan læse meget mere under den engelske sektion.

NY DATO! Drop-in møde om verdens mest forunderlige stof – vand

Vi måtte desværre aflyse vores drop-in møde om vand den 15. marts. Men fortvivl ikke! Vi har fundet en ny dato:

Drop-in mødet afholdes i stedet den 8. juni i Agro Food Park 13, mødelokale PLANT fra kl. 15.00-16.00.

Genlæs opslaget nedenfor:

Vand er verdens mest forunderlige stof. Det udgør grundlaget for vores eksistens som biologiske væsner og besidder en lang række enestående egenskaber. Kom og hør professor, dr. Scient. Søren Rud Keiding give et fascinerende indblik i hvorfor vands kogepunkt og varmekapacitet er så usædvanligt høje, hvorfor det er koldt på toppen – også i et glas vand og nogle af de andre 50 tilfælde, hvor vand arter sig anderledes end alle andre kendte stoffer.

Søren er direktør for Aarhus Institute for Advanced studies, der samler talentfulde forskere fra hele verden i Aarhus. Han har gennem sin forskerkarriere arbejdet med at undersøge vand ved hjælp af laserlys og har bl.a. redigeret og bidraget til den meget populære lærebog "Viden om vand".

Tilføj datoen i din Outlook kalender her og send gerne en mail til srma@agrofoodpark.dk, hvis du ønsker at deltage.

Arrangementet er gratis.

Missede du muligheden for at snakke med HØIBERG om patent?

Du har stadig mulighed for at få hjælp med patenter, kontakt HØIBERG – European Patent Attorneys.

Kan mit produkt patenteres – og hvordan?

Vil du kende svarene på disse spørgsmål, så kontakt HØIBERGs patentrådgiver [Vibeke Bay](#) for at høre nærmere om et gratis og uforpligtende møde.

HØIBERG er et patentbureau, som har mange års erfaring med at hjælpe både nystartede og veletablerede virksomheder, som f.eks. Carlsberg, med patentering af deres fødevareteknologier. Patenter er et vigtigt redskab til at sikre investeringer. Start-up virksomheden [BioPhero](#), som er klient hos HØIBERG, sikrede sig eksempelvis over 100 million kr. i investeringer sidste år.

Hvis du ønsker at lære mere om patenter generelt eller om et specifikt emne, såsom patentering af planter, er du også velkommen til at kontakte Vibeke for at høre nærmere om muligheden for et foredrag omhandlende "Intellectual Property Rights" (IPR) skræddersyet til din virksomhed.

Brug af Clever el-ladestationer

Tiderne skifter og flere og flere får hybrid- eller elbiler. Det er vi glade for. Men det betyder også der er flere om at benytte vores el-ladestationer på Agro Food Park og derfor er det ekstra vigtigt at man husker at overholde reglerne.

Skal du have opladet din bil, er det vigtigt at den er fjernet igen efter **4 timers opladning**, så der er plads til en ny bil. Det skal være muligt for alle at oplade deres bil og komme hjem fra arbejde igen.

Vi anbefaler man sætter p-skiven og en reminder på sin telefon, så tiden overholdes.

Tak for jeres forståelse.

Good morning!

We are ready with more drop-in meetings. Then we would also like to remind everyone on how to use our Clever charging stations.

Have a great week!

Kind regards,
The Agro Food Park Team

Don't forget about the Drop-in meeting on Plant industry, Naturli Foods and Do Not! call me M_lk

The plant industry is Denmark's representative for companies that import, produce and/or market plant-based foods. The union is independent in relation to all other interests and has a very clear profile about taking care of business interests of the green food producers.

Come and hear **CEO Henrik Lund from Naturli' Foods A/S** talk about the plant industry, the development in Naturli' Food A/S, including their latest drink "Do Not! call me M_lk". There will be tastings and the meeting is in English.

The meeting is 6th April from 15.00-16.00 and takes place in the canteen area in Agro Food Park 15. It's free to participate.

[Click here to add the meeting to your Outlook calender](#) and please send an email to srma@agrofoodpark.dk if you wish to participate.

Drop in meeting about plant-based dairy, meat, and seafood substitutes – loved by many consumers, ...and by unwanted microorganisms

Currently, plant-based substitutes are, for several reasons, quite trendy. These substitutes should mimic the animal-based products by the visual appearance, by texture, and taste. But in many cases, the composition of their microflora differs clearly from the microbial landscape in the mimicked animal-based food products.

Consequently, the microbial risks as well as the causes of microbial spoilage are often fundamentally different.

This requires that the assessment of food safety and shelf-life must be approached in a different way, and if necessary, plant-based specific solutions to protect these substitute products must be developed.

One of the most promising strategies to ensure food safety and shelf-life is the use of food-grade microorganisms that are especially adapted to plant-based substitute products. Such bacteria cultures have the potential as biopreservatives, and furthermore, can also be of use to improve taste and texture of such substitutes or even increase their nutritional value.

Presentations by Lisbeth Smith, Dragana Stanojevic, Henrik Jul Topholm, and Dieter Elsser-Gravesen from ISI Food Protection.

The drop-in meeting is April 20th from 15.00-16.00 in Agro Food Park 15 (meeting room 7+9). Participation is for free, but pls. send an mail to srma@agrofoodpark.dk, if you would like to participate.

NEW DATE! Drop-in meeting about the world's most remarkable substance – water

Unfortunately we had to cancel our drop-in meeting about water 15th March. But we have finally found a new date:

The drop-in meeting is now taking place 8th June in Agro Food Park 13, meeting room PLANT from 15.00-16.00.

Re-read the advertisement below:

Come and hear Professor Dr. Scient. Søren Rud Keiding give a fascinating insight into why water's boiling point and heat capacity are so unusually high, and fifty other cases where water behaves differently than all other known substances.

Søren is the director of the Aarhus Institute for Advanced Studies, who brings talented researchers together from around the world in Aarhus. Throughout his career as a researcher, he has examined water using laser light and has among other things contributed to and edited the popular textbook "Viden om vand" (knowledge about water).

[Click here to add the Drop-In meeting to your Outlook calender](#) and send an email to srma@agrofoodpark.dk if you wish to participate.

It is free to participate.

H Ø I B E R G
European Patent Attorneys

Did you miss the opportunity to speak with HØIBERG about patents?

Then you still have the chance to get help, contact HØIBERG – European Patent Attorneys.

Can I patent my product - and how?

If you are wondering, what the answers are for your business, please contact HØIBERG's Patent Attorney [Vibeke Bay](#) to arrange a free and non-binding session.

HØIBERG is a full service patent agency with decades of experience in assisting start-ups and well-established companies, e.g. Carlsberg, in the food tech industry. For start-ups, patents are an important tool for securing investments as evidenced by HØIBERG's client [BioPhero](#) that successfully raised over 100 million DKK last year.

If you want to learn more about patents in general or about a specific topic such as patenting of plants, you are also welcome to contact Vibeke to discuss a potential lecture on Intellectual Property Rights (IPR) tailored to your company's needs.net

Use of Clever charging stations

The times are changing, and more and more people are driving hybrid or electric cars. This also means that more people want to use our Clever charging stations at Agro Food Park, and it is therefore even more important that you remember to follow the rules.

If you need to charge your car it is important that you move it again **after four hours**, so give the space to another car. It should be possible for everyone to charge their car and be able to get home from work.

We recommend setting your parking disc and a reminder on your phone, so you remember to move your car again.

Thank you for your understanding.
